DIRECTIONS FOR USE

DYNAMITE PRO Landscape fertilizers are specially formulated for use on turf, ornamental, and landscape plants.

For **Ornamental and Landscape** plants use a measuring spoon, or hand application. For new planting, the fertilizer may be incorporated into the soil prior to planting or applied to the top of the soil around the plant after planting. For best results apply mulch after fertilization.

For **Trees and Shrubs** spread fertilizer evenly on the ground around the plant from the outer edge (drip line) of the leaves inward to the trunk. Cover the fertilizer with a 1/2 inch of soil or mulch.
